IN OTHER NEWS

Recycling old spectacles and sunglasses

We are still actively collecting old spectacles and both prescription and non-prescription sunglasses which we donate to Vision Aid Overseas. Please drop yours into the box at Reception (no cases please).

Indian Bean Tree in Walpole Park

As the leaves fall from this beautiful tree we are reminded that autumn is on its way. For now though we are still enjoying the last of our Indian summer.

Hope you all had a good summer - perhaps too hot

What a wonderful summer!

It may have been rather hot for some of us, but waking up to blue skies almost every day during the summer was wonderful.

Thought I would share this feeling of lightness in this photo taken on the ferry crossing over to the Isle of Wight in August.

Seecoat DRIVE from Nikon

ALSO OF INTEREST

New spray in our Dry Eye Clinic

We are continually reviewing our Dry Eye Clinic to ensure that we give you the most effective treatment and the best advice on how to manage your symptoms at home.

For those of us who find applying eye drops difficult, we have Optase Spray which is much easier to use.

Colorimetry and Visual Stress

for some but perfect for others!

Recently launched 1 day contact lenses for myopia control

Since introducing the new MiSight 1 day contact lens for myopia control in the spring, we are pleased to say that it has been well received and the young myopes are delighted with the 1 day modality - comfortable and easy. We have been encouraging myopia control with contact lenses for our young myopes since 2011 and been having some great results. But until now there has not been an option of a 1 day lens. This is great news for us as eye care professionals and for all our young myopes too.

Patients are increasingly complaining of difficulty driving at night due to glare. This new DRIVE lens does what it says on the packet. Joy is wearing this coating and is delighted with it.

New consulting rooms.

It is just over 3 years since we completed the refurbishment of the reception area. This year we have re-furbished both the consulting rooms.

Thank you to everyone for your lovely comments on the new look.

Never stand still.....

Joy runs the Dyslexia and Vision Clinic at Hynes. Since 2011 many children and adults have had colorimetry to test for Visual Stress. We are pleased to announce that we have just taken delivery of the latest Colorimeter Curve machine which has certainly stepped into the 21st Century with its new digital technology.

For people who suffer from Visual Stress, the addition of a precision tinted lens for reading and other close tasks can make a big difference.

Recently a young teenager demonstrated this very clearly where she could not see the print without her precision tinted spectacles and with them on, read fluently.

New overnight lenses

For those who have been visiting Hynes over the years, you know that we never stand still. There is always another instrument that Joy needs to add to the ever expanding arsenal. Our newest acquisition is a Topographer which we use in both our contact lens and dry eye clinics.

We have just introduced yet another modality of contact lenses in the practice. Not new in the field, this type of contact lens is worn overnight. On waking and removing the lenses from your eyes you are spectacle and contact lens free all day. Tracey's daughter volunteered to be our first patient and is delighted with the result. This type of contact lens is suitable for children especially for myopia control, for adults and is an attractive option for sportsmen and women.

Call us for more details.
