IN OTHER NEWS

Recycling old spectacles and sunglasses

We are still actively collecting old spectacles and both prescription and non-prescription sunglasses for Tracey to take on her next mission - all donations gratefully accepted.

SPRING is here at last!

What a cheery sight to see all the blossom after a long cold winter.

It hardly seems possible that three years ago we were putting the finishing touches to our practice refurbishment. We still have patients coming in and being amazed by the different look.

New equipment for the Hynes Team

Last week at Optrafair in Birmingham we had a great time looking at new equipment - some to buy and some to wish for!

We came away with a topographer which will be used in our contact lens and dry eye clinics. A new tonometer for measuring the eye pressure - one that does not blow air on your eye.

For the second consulting room a new chair and column with all the bells and whistles on it.

Delivery takes several weeks but it is exciting all the same.

Get ready for Summer - 20% off promotion!

ALSO OF INTEREST

Blephex in our Dry Eye Clinic

We are continually reviewing our Dry Eye Clinic to make sure that we give you the most effective treatment in-practice and the best advice on how to manage your symptoms at home.

Last week at Optrafair in Birmingham we were able to source new products for lid margin disease and dry eye and Asif who runs this Clinic will be able to tell you more if you need a treatment.

Colorimetry and Visual Stress

This year the consulting rooms are getting an facelift - the plans are being finalised and by the end of May both rooms should be completed.

Recently launched 1 day contact lenses for myopia control

The brand new MiSight 1 day contact lens for myopia control has just arrived in practice. We have been encouraging myopia control with contact lenses for our young myopes since 2011 and been having some great results. But until now there has not been an option of a 1 day lens.

This is great news for us as eye care professionals and for all our young myopes too.

Interested in knowing more about how contact lenses are being used in myopia control? Pop in to the practice and speak to one of the optometrists who will be pleased to help.

Are you ready with your sunglasses to brave the glare of the coming weeks?

We are having a sunglass promotion from the 1st May for two weeks only.

20% off sunglass frames - check in-practice for more details.

Just launched new Seecoat DRIVE from Nikon

We are excited to tell you about this new driving lens, just launched by Nikon lenswear.

Patients are increasingly complaining about difficulty with driving at night - this new DRIVE lens promises to make night vision easier and more comfortable.

Joy runs the Dyslexia and Vision Clinic at Hynes. Since 2011 many children and adults have had colorimetry to test for Visual Stress. We are pleased to announce that we have just taken delivery of the latest Colorimeter Curve machine which has certainly stepped into the 21st Century with its new shape and digital technology.

For people who suffer from Visual Stress, the addition of a precision tinted lens for reading and other close tasks can make a big difference.

Recently a young teenager demonstrated this very clearly where she could not see the print without her precision tinted spectacles and with them on, read fluently.

SALT - new eyewear brand coming soon...

SALT combines the best of California lifestyle and Japanese craftsmanship to create premium eyewear.

Coming to Hynes Optometrists soon.
